GLOBAL GENDER GAP REPORT 2021

WHAT IS GLOBAL GENDER GAP REPORT 2021?

Global Gender Gap Report 2021 is designed to "measure gender-based gaps in access to resources and opportunities in countries rather than the actual levels of the available resources and opportunities in those countries. Currently, the report covers 156 economies around the globe, over 93% of the world's population.

THE REPORT EXAMINES FOUR OVERALL AREAS OF INEQUALITY BETWEEN MEN AND WOMEN

- Economic participation and opportunity –outcomes on salaries, participation levels and access to high-skilled employment
- Educational attainment –outcomes on access to basic and higher level education
- Political empowerment –outcomes on representation in decision-making structures
- Health and survival –outcomes on life expectancy and sex ratio.

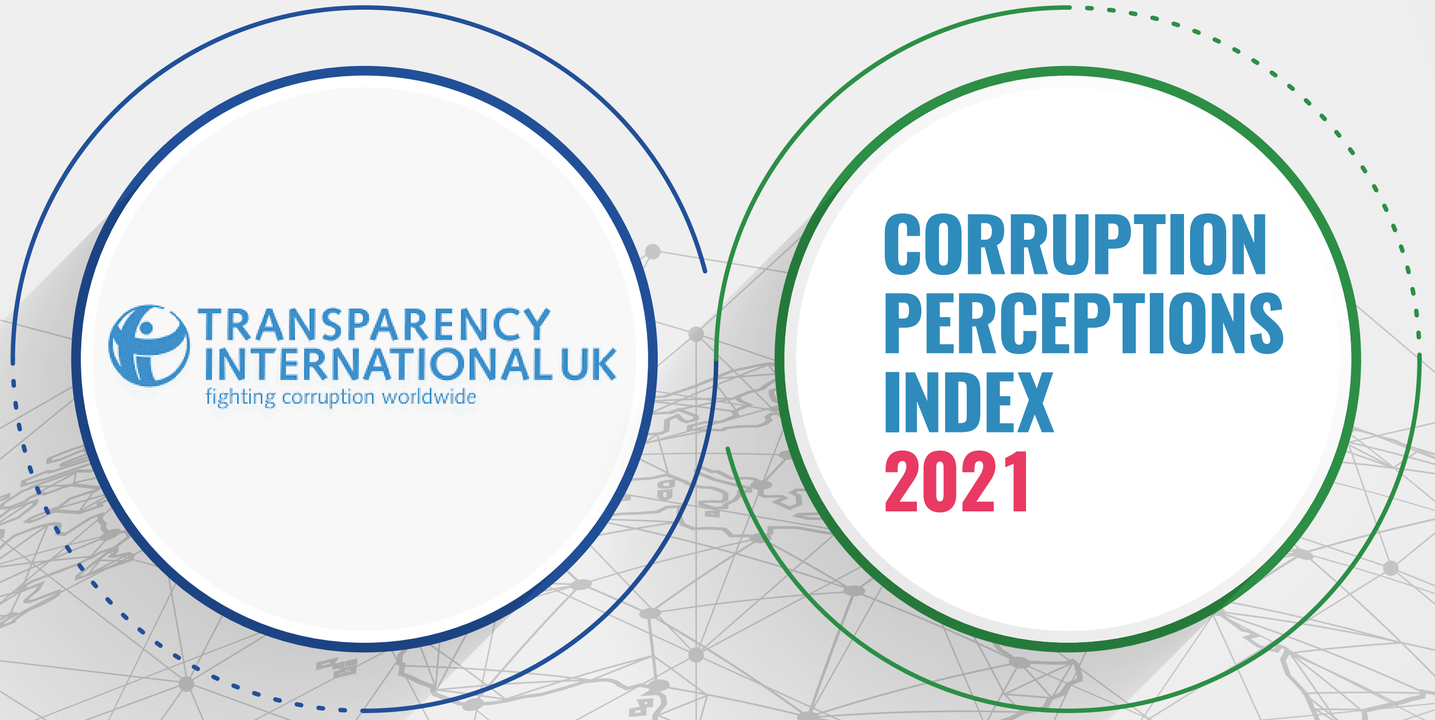
CORRUPTION PERCEPTIONS INDEX 2021



WHAT IS CORRUPTION PERCEPTIONS INDEX 2021?

The Corruption Perceptions index 2021, which ranks 180 countries and territories by their perceived levels of public sector corruption according to experts and businesspeople, uses a scale of 0 to 100, where 0 is highly corrupt and 100 is very clean. More than two-thirds of countries score below 50 on this year's CPI, with an average score of just 43.

The Corruption Perceptions Index (CPI) aggregates data from a number of different sources that provide perceptions by business people and country experts of the level of corruption in the public sector.

The following steps are followed to calculate the CPI:

STEP 01 Select data sources: Each data source that is used to construct the CPI must fulfil the a criteria to qualify as a valid source

STEP 02 Standardise data sources to a scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

STEP 03 Calculate the average: For a country or territory to be included in the CPI, a minimum of three sources must assess that country.

STEP 04 Report a measure of uncertainty: The CPI is accompanied by a standard error and confidence interval associated with the score, which captures the variation in scores of the data sources available for that country/territory.

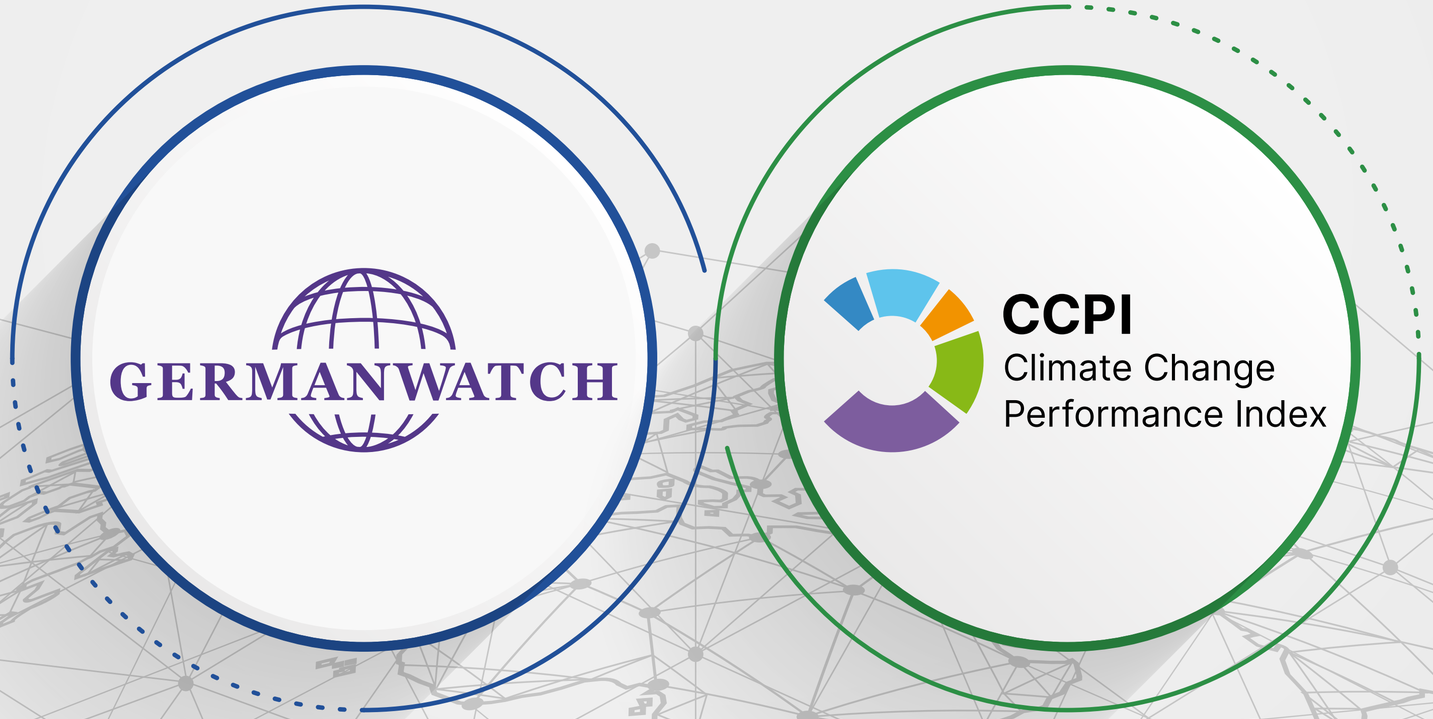
CLIMATE CHANGE PERFORMANCE INDEX 2022



WHAT IS CLIMATE CHANGE PERFORMANCE INDEX 2022 ?

The Climate Change Performance Index 2022 is an instrument designed to enhance transparency in international climate politics. Its aim is to put political and social pressure on those countries which have, up until now, failed to take ambitious action on climate protection.

Methodology

The CCPI currently evaluates the climate protection performance of 60 countries and the European Union, which together generate 90%+ of global greenhouse gas emissions. Using standardised criteria, the CCPI looks at four categories, with 14 indicators: Greenhouse Gas Emissions (40% of the overall score), Renewable Energy (20%), Energy Use (20%), and Climate Policy (20%). The CCPI's unique climate policy section evaluates countries' progress in implementing policies working towards achieving the Paris Agreement goals.
